

I've been made aware that you are considering expanding LPFM services that would allow these stations to take priority over current FM translator service. If this is enacted then I am worried that I will lose my local signal to K-LOVE which is heard on 91.1 in the Denver area. This station provides good, MORAL, music that I encourage my children to listen to. I do not want to lose this, and have to opt to not listen to the radio at all, as I will NOT allow my children to listen to the sex, drugs, and other garbage that currently takes up almost all other air waves. K-LOVE fills a much needed gap in today's radio market. They provide good clean music, encouragement, needed resources, & news, which is a service appreciated by many in the community. Thank you for your time.
